Subject index

Adatoms,
electrocatalysis by thallium ——— of the oxidation of formic acid on platinized platinum (Kazarinov et al.) 137
Electrocatalytic properties of metal ——— in a potential range negative to Nernstian bulk deposition (Xing, Scherson) 273
Amino radicals,
the cathodic cleavage of aromatic sulphonamides: an elegant way to produce ——— themselves fully characterized by means of the spin marking technique (Kossai et al.) 253
Anodic stripping voltammetry,
theoretical comparison of linear scan and staircase ———. Restricted and infinitive diffusion (Penczek et al.) 1
Aprotic electrolytes,
electrochemical incorporation of lithium into palladium from ——— (Dalard et al.) 445
Array electrodes,
theory of the steady-state current of a redox couple at interdigitated ——— of which pairs are insulated electrically by steps (Aoki) 35
Aryl amines,
the indirect anodic oxidation of *m*-phenoxytoluene mediated by brominated ——— (Pletcher, Zappi) 401
Avrami theorem,
on the validity of the ——— in the case of decelerating growth (Mulder et al.) 7
Azobenzene,
photoelectrochemical behavior of an ——— derivative in Langmuir–Blodgett films. Enhanced reduction via the participation of its excited states (Liu et al.) 437

Benzimidazole,
the formation of a compact polymer film on a copper electrode from ——— solution (Xue et al.) 163
Bipyridilium,
thin layer electrochemistry in a paper matrix: electrochromography of Prussian Blue and two ——— systems (Rosseinsky, Monk) 473
Brominated aryl amines,
the indirect anodic oxidation of *m*-phenoxytoluene mediated by ——— (Pletcher, Zappi) 401

Carbon dioxide,
kinetics and mechanism of "reduced CO_2" electrooxidation on electrodispersed platinum in different acid solutions (Marcos et al.) 205
Carbon monoxide,
in-situ IR spectroscopy with a gas diffusion cell. ——— adsorption and oxidation on Pt (Lu, Bewick) 225
Charge propagation,
the effect of supporting electrolyte and temperature on the rate of ——— through thin films of $[Os(bipy)_2PVP_{10}Cl]Cl$ coated on stationary electrodes (Forster et al.) 365
Chloride ion,
surface structural changes of evaporated thin silver film electrodes during the adsorption of ——— (Tucceri, Posadas) 415
Chromatographic techniques,
a kinetic study of the oxidation of glyoxal on platinum-based electrodes by ——— (Belgsir et al.) 151
Chromium,
the kinetics of electroreduction of ——— (III) at mercury in dimethylformamide solutions (Fawcett, Markušová) 119
Compact layers,
the growth of ——— at the electrode interface. Part IV. Fractal character of uracil films at the mercury–aqueous electrolyte interface (Wandlowski, Pospíšil) 319
Copper,
the formation of a compact polymer film on

a ——— electrode from benzimidazole solution (Xue et al.) 163
Crystallographic orientation,
the electrochemical generation of surfaces of specific ——— on gold single crystal sphere electrodes (Twomey) 465
Cyclic potential ring measurement,
———: a new method for quantitative detection of peroxide formation during oxygen reduction using the rotating ring–disc electrode technique (Vilambi, Taylor) 61

Decelerating growth,
on the validity of the Avrami theorem in the case of ——— (Mulder et al.) 7
Diffusion,
theoretical comparison of linear scan and staircase anodic stripping voltammetry. Restricted and infinitive ——— (Penczek et al.) 1
Dimethylformamide,
the kinetics of electroreduction of Cr(III) at mercury in ——— solutions (Fawcett, Markušová) 119

Electrochromography,
thin layer electrochemistry in a paper matrix: ——— of Prussian Blue and two bipyridilium systems (Rosseinsky, Monk) 473
Electron transfer,
solvent effects on simple ——— reactions. A comparison of results for homogeneous and heterogeneous systems (Fawcett, Foss, Jr.) 103

Fast scan cyclic voltammetry,
kinetic study on the dimerization reaction of 9-methoxyanthracene cation radical by means of ——— (Nozaki et al.) 191
Ferricytochrome *c*,
electrochemically distinguishable states of ——— and their transition with changes in temperature and pH (Ikeshoji et al.) 297
Flatband potential shifts,
analysis of the photocurrent transient behaviour associated with ——— during water splitting at n-TiO_2 electrodes (Tafalla, Salvador) 285
Formic acid,
electrocatalysis by thallium adatoms of the oxidation of ——— on platinized platinum (Kazarinov et al.) 137

Gas diffusion cell,
in-situ IR spectroscopy with a ———. CO adsorption and oxidation on Pt (Lu, Bewick) 225
Glucose,
the effect of ——— on electroreduction of phosphate at a Pt electrode. An indirect method of glucose detection in KRPB solution (Khan, Liu) 237
Glyoxal,
a kinetic study of the oxidation of ——— on platinum-based electrodes by chromatographic techniques (Belgsir et al.) 151
Gold,
some consequences of mixed and dilute surface modification of ——— electrodes for protein electrochemistry (Hill, Lawrance) 309
The electrochemical generation of surfaces of specific crystallographic orientation on ——— single crystal sphere electrodes (Twomey) 465

Heavy water,
production of tritium from D_2O electrolysis at a palladium cathode (Packham et al.) 451
Heptyl viologen,
electrochemical reduction of ——— at platinum studied by time-resolved resonance Raman spectroscopy (Osawa, Sučtaka) 261

Interdigitated array electrodes,
theory of the steady-state current of a redox couple at ——— of which paris are insulated electrically by steps (Aoki) 35

Krebs–Ringer phosphate buffer,
the effect of glucose on electroreduction of phosphate at a Pt electrode. An indirect method of glucose detection in ——— solution (Khan, Liu) 237

Light scattering,
——— from a nucleating surface. Part II (Bobbert et al.) 21
Lithium,
electrochemical incorporation of ——— into palladium from aprotic electrolytes (Dalard et al.) 445

Mercury,
the kinetics of electroreduction of Cr(III) at ——— in dimethylformamide solutions (Fawcett, Markušová) 119

9-Methoxyanthracene,
kinetic study on the dimerization reaction of ——— cation radical by means of fast scan cyclic voltammetry (Nozaki et al.) 191
Methyl viologen,
reduction of ——— in a resistive water-in-oil microemulsion (Wang et al.) 407
Microdisc electrodes,
kinetic parameters from steady-state voltammograms at ——— (Oldham et al.) 79

Nafion,
in situ characterization of platinum particles dispersed in ——— films on gold electrodes by infrared spectroscopy (Osawa et al.) 459
Nernstian bulk deposition,
electrocatalytic properties of metal adatoms in a potential range negative to ——— (Xing, Scherson) 273
Nucleating surface,
light scattering from a ———. Part II (Bobbert et al.) 21

Ohmic drop,
on-line compensation of ——— in submicrosecond time resolved cyclic voltammetry at ultramicroelectrodes (Amatore et al.) 43
Osmium,
the effect of supporting electrolyte and temperature on the rate of charge propagation through thin films of $[Os(bipy)_2PVP_{10}Cl]Cl$ coated on stationary electrodes (Forster et al.) 365
Oxygen reduction,
CPRM: a new method for quantitative detection of peroxide formation during ——— using the rotating ring–disc electrode technique (Vilambi, Taylor) 61

Palladium,
electrochemical incorporation of lithium into ——— from aprotic electrolytes (Dalard et al.) 445
Production of tritium from D_2O electrolysis at a ——— cathode (Packham et al.) 451
Paper matrix,
thin layer electrochemistry in a ———: electrochromography of Prussian Blue and two bipyridilium systems (Rosseinsky, Monk) 473
Perchlorate,
the adsorption of tetraethylammonium ions at a mercury electrode from ——— solutions (Torrent et al.) 381
Peroxide formation,
CPRM: a new method for quantitative detection of ——— during oxygen reduction using the rotating ring–disc electrode technique (Vilambi, Taylor) 61
m-Phenoxytoluene,
the indirect anodic oxidation of ——— mediated by brominated aryl amines (Pletcher, Zappi) 401
Phosphate,
the effect of glucose on electroreduction of ——— at a Pt electrode. An indirect method of glucose detection in KRPB solution (Khan, Liu) 237
Platinum,
a kinetic study of the oxidation of glyoxal on ——— -based electrodes by chromatographic techniques (Belgsir et al.) 151
An ellipsometric study of polypyrrole films on ——— (Hamnett et al.) 479
Cation effects on the vibrational frequencies of adsorbed thiocyanate on ——— (Ashley et al.) 349
Electrocatalysis by thallium adatoms of the oxidation of formic acid on platinized ——— (Kazarinov et al.) 137
Electrochemical reduction of heptyl viologen at ——— studied by time-resolved resonance Raman spectroscopy (Osawa, Suëtaka) 261
Influence of specific adsorption of anions on the electrochemical behaviour of the Pt (100) surface in acid medium. Comparison with Pt (111) (Armand, Clavilier) 331
In situ characterization of ——— particles dispersed in Nafion films on gold electrodes by infrared spectroscopy (Osawa et al.) 459
In-situ IR spectroscopy with a gas diffusion cell. CO adsorption and oxidation on ——— (Lu, Bewick) 225
Kinetics and mechanism of "reduced CO_2" electrooxidation on electrodispersed ——— in different acid solutions (Marcos et al.) 205
The effect of glucose on electroreduction of phosphate at a ——— electrode. An indirect method of glucose detection in KRPB solution (Khan, Liu) 237
Polyaniline,
frequency resolved transmittance measurements on ——— films (Hutton et al.) 429
Preparation of highly conducting polyanilines (Yoshikawa et al.) 421

Polymer,
the formation of a compact ——— film on a copper electrode from benzimidazole solution (Xue et al.) 163
Polypyrrole,
an ellipsometric study of ——— films on platinum (Hamnett et al.) 479
Protein electrochemistry,
some consequences of mixed and dilute surface modification of gold electrodes for ——— (Hill, Lawrance) 309
Prussian Blue,
thin layer electrochemistry in a paper matrix: electrochromography of ——— and two bipyridilium systems (Rosseinsky, Monk) 473

Ring-disc electrode,
CPRM: a new method for quantitative detection of peroxide formation during oxygen reduction using the rotating ——— technique (Vilambi, Taylor) 61

Semiconductor electrodes,
thermal electron excitation as a probe for chemical and electrochemical steps in the anodic dissolution of III–V ——— (Vanmaekelbergh et al.) 175
Silicon polytungstate,
——— ($SiW_{12}O_{40}^{4-}$)-derivatised titanium dioxide (TiO_2)/electrolyte interfaces (Wu, McEvoy) 395
Silver,
surface structural changes of evaporated thin ——— film electrodes during the adsorption of chloride ion (Tucceri, Posadas) 415
Specific adsorption,
influence of ——— of anions on the electrochemical behaviour of the Pt (100) surface in acid medium. Comparison with Pt (111) (Armand, Clavilier) 331
Spin marking technique,
the cathodic cleavage of aromatic sulphonamides: an elegant way to produce amino radicals themselves fully characterized by means of the ——— (Kossai et al.) 253
Sulphonamides,
the cathodic cleavage of aromatic ———: an elegant way to produce amino radicals themselves fully characterized by means of the spin marking technique (Kossai et al.) 253

Tetraethylammonium ions,
the adsorption of ——— at a mercury electrode from perchlorate solutions (Torrent et al.) 381
Thallium,
electrocatalysis by ——— adatoms of the oxidation of formic acid on platinized platinum (Kazarinov et al.) 137
Thermal electron excitation,
——— as a probe for chemical and electrochemical steps in the anodic dissolution of III–V semiconductor electrodes (Vanmaekelbergh et al.) 175
Thiocyanate,
cation effects on the vibrational frequencies of adsorbed ——— on platinum (Ashley et al.) 349
Time resolved cyclic voltammetry,
on-line compensation of ohmic drop in submicrosecond ——— at ultramicroelectrodes (Amatore et al.) 43
Titanium dioxide,
analysis of the photocurrent transient behaviour associated with flatband potential shifts during water splitting at n-TiO_2 electrodes (Tafalla, Salvador) 285
Silicon polytungstate ($SiW_{12}O_{40}^{4-}$)-derivatised ——— (TiO_2)/electrolyte interfaces (Wu, McEvoy) 395
Tritium,
production of ——— from D_2O electrolysis at a palladium cathode (Packham et al.) 451

Ultramicroelectrodes,
on-line compensation of ohmic drop in submicrosecond time resolved cyclic voltammetry at ——— (Amatore et al.) 43
Uracil,
the growth of compact layers at the electrode interface. Part IV. Fractal character of ——— films at the mercury–aqueous electrolyte interface (Wandlowski, Pospíšil) 319

Vibrational frequencies,
cation effects on the ——— of adsorbed thiocyanate on platinum (Ashley et al.) 349

Water splitting,
analysis of the photocurrent transient behaviour associated with flatband potential shifts during ——— at n-TiO_2 electrodes (Tafalla, Salvador) 285
